Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150917S01: A sample from another SDG was used for the MS/MSD. Consequently, an assessment of matrix affects cannot be made. The LCS was performed in duplicate to provide accuracy and precision for this batch. QC Batch 150918S03, Client Sample ID BA4DC01201341-43: For 2,4'-DDE, 4,4'-DDE, and 4,4'-DDMU, the sample concentrations are greater than four times the spike concentrations so precision and accuracy could not be evaluated for these analytes. High MSD %R = 156% for 2,4'-DDT and 143% for 4,4'-DDD. Associated detected results are qualified as estimated with a potential high bias (J+). Since all of the samples in this SDG represent a single sediment core, the MS/MSD sample is representative of all batches in this SDG. See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries. Very Low MS %R = 9% for 4,4'-DDNU and MS/MSD %R = 0%/3% for 4,4'-DDT. Associated detected results are qualified as estimated with a potential low bias (J-), and non-detected results are rejected (R). A high RPD of 50% for 2,4'-DDT was also noted in QC Batch 150918S03. The associated results are qualified as estimated (J/UJ).
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA4DC01201321-23: 5x, BA4DC01201325-27: 5x, BA4DC01201329-31: 5x, BA4DC01201333-35: 5x, BA4DC01201337-39: 5x, BA4DC01201341-43: 5x, BA4DC01201345-47: 5x, BA4DC01201349-51: 5x, BA4DC01201353-55: 10x, BA4DC01201357-59: 10x, BA4DC01201361-63: 10x, BA4DC01201365-67: 5x, and BA4DC01201369-71: 5x.
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?			•	No field duplicates.

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021762. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 770 results (100.00%) out of the 770 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include four individual samples and ten composite samples of two samples each. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/18/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

Analytical Method	Comment
A2540B	No additional comments; see Checklist for detail.
BNASIM	Percent Solids less than 50% for the following Client Sample ID: BA1C01201301– 49.1%. All associated results are qualified as estimated J/UJ.
PCBSIM	Percent Solids less than 50% for the following Client Sample ID: BA1C01201301– 49.1%. All associated results are qualified as estimated J/UJ.
SW9060	Percent Solids less than 50% for the following Client Sample ID: BA1C01201301– 49.1%. All associated results are qualified as estimated J/UJ.

Reason Code Definitions

Code	Definition
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150918S07, Client Sample ID BA1C01201309-11: For 4,4'-DDE and 4,4'-DDMU, the sample concentrations are greater than four times the spike concentrations so precision and accuracy could not be evaluated for these analytes. It was noted for 4,4'-DDE and 4,4'-DDMU, the parent sample concentration is reported from the 1x dilution rather than the 5x dilution of the parent sample on the Quality Control - Spike/Spike Duplicate Report. No qualification is warranted on this basis. High MSD %R = 143% for 2,4'-DDD, 133% for 2,4'-DDT, and 131% for 4,4'-DDD. Associated detected results are qualified as estimated with a potential high bias (J+). Since all of the samples in this SDG represent a single sediment core, the MS/MSD sample is representative of all batches in this SDG. See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries.
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA1C01201303: 5x, BA1C01201305: 5x, BA1C01201307: 5x, BA1C01201309-11: 5x, BA1C01201313-15: 5x, BA1C01201317-19: 5x, BA1C01201321-23: 5x, BA1C01201325-27: 5x, and BA1C01201333-35: 5x.
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?			•	No field duplicates.

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021764. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Field Duplicate
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 990 results (100.00%) out of the 990 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include five individual samples and 13 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/19/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

The project samples in SDG 15-02-1764 are the field duplicate samples for Location ID BA4C. Project samples from SDG 15-02-1772 were submitted as the primary samples for this analysis. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ). See the Field Duplicate Report for specific qualifications.

Reason Code Definitions

Code	Definition
D5	Field duplicate precision
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: A2540B

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?			•	
Stage 2 Review: Samples - Analysis date?	•			09/21/2015
Stage 2 Review: Samples - Holding time?		•		The holding time exceeded project criteria of 180 days. The associated results are estimated with a potential low bias (J-).
Stage 2 Review: Samples - Batching?	•			F0921TSB1 / F0921TSD1
Stage 2 Review: Samples - Lab qualifiers?		•		
Stage 2 Review: Calibration - Oven Temp Start?	•			
Stage 2 Review: Calibration - Oven Temp End?	•			
Stage 2 Review: Calibration - Balance Calibration Check?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Precision/Accuracy - Lab Replicate?	•			QC Batch F0921TSD1: The Laboratory Replicate for Client Sample ID BA4C02201325-27 met criteria.
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Results (i.e. correct analytes)?	•			
Stage 2 Review: Field Duplicates - RPD within limits?	•			Acceptable precision was demonstrated by the results reported for the field duplicate pairs submitted and analyzed for this method.

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time. A sample from another SDG was used for the MS/MSD analysis in QC Batch 150928S03.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?	•			09/28/2015
Stage 2 Review: Samples - Analysis date?	•			10/08/2015, 10/09/2015, 10/12/2015, and 10/13/2015
Stage 2 Review: Samples - Holding time?		•		Holding time exceeded project criteria, but samples were extracted and analyzed within 2x holding time. The associated samples are qualified as estimated with a potential low bias (J-/UJ).
Stage 2 Review: Samples - Batching?	•			150928L03 / 150928S03
Stage 2 Review: Samples - Surrogate recoveries?	•			
Stage 2 Review: Samples - Lab qualifiers?	•			J-Flag: Result >= MDL, <= RL.
Stage 2 Review: Samples - Internal Standard recoveries?	•			
Stage 2 Review: Calibration - ICAL?	•			
Stage 2 Review: Calibration - ICV?	•			
Stage 2 Review: Calibration - CCV?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Blank - Equipment blank?			•	
Stage 2 Review: Instrument - Tune?	•			
Stage 2 Review: Instrument - Breakdown Standard?			•	
Stage 2 Review: Precision/Accuracy - Lab Replicates?			•	
Stage 2 Review: Precision/Accuracy - MS/MSD?			•	QC Batch 150928S03: A project sample from another SDG was used for the MS/MSD analysis. Consequently, an assessment of matrix affects cannot be made for this batch. The LCS was performed in duplicate to provide accuracy and precision for this batch.
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA4C02201301: 10x BA4C02201303: 10x BA4C02201305: 10x BA4C02201307: 10x BA4C02201309-11: 10x BA4C02201313-15: 10x BA4C02201317-19: 10x BA4C02201321-23: 10x BA4C02201325-27: 10x and 50x BA4C02201329-31: 10x and 50x BA4C02201333-35: 10x and 50x BA4C02201337-39: 10x BA4C02201341-43: 10x BA4C02201349-51: 10x
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?		•		Precision between field duplicate pairs met criteria for this method except as noted in the Field Duplicate Report. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ).

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021767. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 1045 results (100.00%) out of the 1045 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include five individual samples and 14 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/19/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

The project samples in SDG 15-02-1767 are the primary samples for Location ID BA5B. Project samples from SDG 15-02-1771 were submitted as field duplicate pairs for this analysis. Field duplicate pairs were not submitted for Client Sample ID BA5B01201365 from this SDG. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ). See the Field Duplicate Report for specific qualifications.

Reason Code Definitions

Code	Definition
D5	Field duplicate precision
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S	Surrogate recovery out of criteria (upper or lower limit)
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: A2540B

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?			•	
Stage 2 Review: Samples - Analysis date?	•			09/21/2015
Stage 2 Review: Samples - Holding time?		•		The holding time exceeded project criteria of 180 days. The associated results are estimated with a potential low bias (J-).
Stage 2 Review: Samples - Batching?	•			F0921TSB7 / F0921TSD7
Stage 2 Review: Samples - Lab qualifiers?		•		
Stage 2 Review: Calibration - Oven Temp Start?	•			
Stage 2 Review: Calibration - Oven Temp End?	•			
Stage 2 Review: Calibration - Balance Calibration Check?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Precision/Accuracy - Lab Replicate?	•			QC Batch F0921TSD7: The Laboratory Replicate for Client Sample ID BA5B01201307 met criteria.
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Results (i.e. correct analytes)?	•			
Stage 2 Review: Field Duplicates - RPD within limits?	•			Precision between field duplicate pairs met criteria for this method.

Review Questions

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time. QC Batch 151001S03, Client Sample ID BA5B01201365: The MS/MSD percent recoveries/RPDs for one or more analytes were outside the control limits.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?	•			10/01/2015
Stage 2 Review: Samples - Analysis date?	•			10/23/2015 and 10/24/2015
Stage 2 Review: Samples - Holding time?		•		Holding time exceeded project criteria, but samples were extracted and analyzed within 2x holding time. The associated samples are qualified as estimated with a potential low bias (J-/UJ).
Stage 2 Review: Samples - Batching?	•			151001L03 / 151001S03
Stage 2 Review: Samples - Surrogate recoveries?	•			
Stage 2 Review: Samples - Lab qualifiers?	•			J-Flag: Result >= MDL, <= RL.
Stage 2 Review: Samples - Internal Standard recoveries?	•			
Stage 2 Review: Calibration - ICAL?	•			
Stage 2 Review: Calibration - ICV?	•			
Stage 2 Review: Calibration - CCV?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Blank - Equipment blank?			•	
Stage 2 Review: Instrument - Tune?	•			
Stage 2 Review: Instrument - Breakdown Standard?			•	
Stage 2 Review: Precision/Accuracy - Lab Replicates?			•	
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 151001S03, Client Sample ID BA5B01201365: High MS/MSD % recoveries for 2,4'-DDT of 132% (MSD) and 4,4'-DDT of 136% / 126%. Associated detected results are qualified as estimated with a potential high bias (J+).
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			
Stage 2 Review: Quantitation - PQLs?	•			

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA5B01201301: 10x BA5B01201303: 10x BA5B01201305: 10x BA5B01201307: 10x and 50x BA5B01201309-11: 10x and 100x BA5B01201313-15: 10x and 50x BA5B01201317-19: 10x and 200x BA5B01201321-23: 10x BA5B01201325-27: 10x BA5B01201341-43: 10x
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?		•		Precision between field duplicate pairs met criteria for this method except as noted in the Field Duplicate Report. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ).

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021768. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 550 results (100.00%) out of the 550 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include four individual samples and six composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/18/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

The project samples in SDG 15-02-1768 are the primary samples for Location ID BA2B. Project samples from SDG 15-02-1776 were submitted as the field duplicate samples for this analysis. Field duplicate samples were not submitted for the following Client Sample IDs: BA2B01201321-23, BA2B01201325-27, and BA2B01201329 -31 in this SDG. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ). See the Field Duplicate Report for specific qualifications.

Reason Code Definitions

Code	Definition
D5	Field duplicate precision
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S	Surrogate recovery out of criteria (upper or lower limit)
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: A2540B

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time.
Stage 2 Review: Samples - Collection date?	•			11/18/2013
Stage 2 Review: Samples - Extraction date?			•	
Stage 2 Review: Samples - Analysis date?	•			09/18/2015
Stage 2 Review: Samples - Holding time?		•		The holding time exceeded project criteria of 180 days. The associated results are estimated with a potential low bias (J-).
Stage 2 Review: Samples - Batching?	•			F0918TSB8 / F0918TSD8
Stage 2 Review: Samples - Lab qualifiers?		•		
Stage 2 Review: Calibration - Oven Temp Start?	•			
Stage 2 Review: Calibration - Oven Temp End?	•			
Stage 2 Review: Calibration - Balance Calibration Check?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Precision/Accuracy - Lab Replicate?	•			QC Batch F0918TSD8: The Laboratory Replicate for Client Sample ID BA2B01201303 met criteria.
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Results (i.e. correct analytes)?	•			
Stage 2 Review: Field Duplicates - RPD within limits?	•			Acceptable precision was demonstrated by the results reported for the field duplicate pairs submitted and analyzed for this method.

Review Questions

Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time. QC Batch 150928S01, Client Sample ID BA2B01201313-15: The MS/MSD percent recoveries/RPDs for one or more analytes were outside the control limits.
Stage 2 Review: Samples - Collection date?	•			11/18/2013
Stage 2 Review: Samples - Extraction date?	•			09/28/2015
Stage 2 Review: Samples - Analysis date?	•			10/14/2015, 10/15/2015, and 10/20/2015
Stage 2 Review: Samples - Holding time?		•		Holding time exceeded project criteria, but samples were extracted and analyzed within 2x holding time. The associated samples are qualified as estimated with a potential low bias (J-/UJ).
Stage 2 Review: Samples - Batching?	•			150928L01 / 150928S01
Stage 2 Review: Samples - Surrogate recoveries?	•			
Stage 2 Review: Samples - Lab qualifiers?	•			J-Flag: Result >= MDL, <= RL.
Stage 2 Review: Samples - Internal Standard recoveries?	•			
Stage 2 Review: Calibration - ICAL?	•			
Stage 2 Review: Calibration - ICV?	•			
Stage 2 Review: Calibration - CCV?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Blank - Equipment blank?			•	
Stage 2 Review: Instrument - Tune?	•			
Stage 2 Review: Instrument - Breakdown Standard?			•	
Stage 2 Review: Precision/Accuracy - Lab Replicates?			•	
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150928S01, Client Sample ID BA2B01201313-15: For 4,4'-DDE, the sample concentration is greater than four times the spike concentration, so precision and accuracy could not be evaluated for this analyte. Low MSD % recovery for 2,4'-DDE (43%). Associated results are qualified as estimated with a potential low bias (J-/UJ). See QC Outlier Report for %R corrected for wet weight reporting of spike recovery.

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021769. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Lab Replicate RPD
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 935 results (100.00%) out of the 935 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include four individual samples and 13 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/18/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

Reason Code Definitions

Code	Definition
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Automated Data Review Detail Report for 15021769
EPA, Region 9
Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021770. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 935 results (100.00%) out of the 935 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include four individual samples and 13 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/20/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

Analytical Method	Comment
A2540B	No additional comments; see Checklist for detail.
BNASIM	No additional comments; see Checklist for detail.
PCBSIM	No additional comments; see Checklist for detail.

Reason Code Definitions

Code	Definition
D2	MS RPD exceeded established criteria.
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150930S01, Client Sample ID BA7DC01201337-39: For 4,4'-DDE and 4,4'-DDT, the sample concentrations are greater than four times the spike concentrations so precision and accuracy could not be evaluated for these analytes. High MS %R = 128% for 4,4'-DDD. Associated detected results are qualified as estimated with a potential high bias (J+). See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries.

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021771. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Field Duplicate
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 1045 results (100.00%) out of the 1045 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include four individual samples and 15 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/19/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

The project samples in SDG 15-02-1771 are the field duplicate samples for Location ID BA5B. Project samples from SDG 15-02-1767 were submitted as primary samples for this analysis. Field duplicate pairs were not submitted for Client Sample ID BA5B02201365-67 from this SDG. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ). See the Field Duplicate Report for specific qualifications.

Reason Code Definitions

Code	Definition
D2	MS RPD exceeded established criteria.
D5	Field duplicate precision
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S	Surrogate recovery out of criteria (upper or lower limit)
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Automated Data Review Detail Report for 15021771
EPA, Region 9
Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California

Review Questions

Method: A2540B

Review Questions	Yes	No	NA	Comment
Stage 2 Review: COC - Custody Trail?	•			
Stage 2 Review: COC - Temperature/Condition?	•			
Stage 2 Review: COC - Receipt anomalies?	•			See SDG comments.
Stage 2 Review: COC - Sample/Methods checked?	•			
Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?			•	
Stage 2 Review: Samples - Analysis date?	•			09/21/2015
Stage 2 Review: Samples - Holding time?		•		The holding time exceeded project criteria of 180 days. The associated results are estimated with a potential low bias (J-).
Stage 2 Review: Samples - Batching?	•			F0921TSB5/ F0921TSD5
Stage 2 Review: Samples - Lab qualifiers?		•		
Stage 2 Review: Calibration - Oven Temp Start?	•			
Stage 2 Review: Calibration - Oven Temp End?	•			
Stage 2 Review: Calibration - Balance Calibration Check?	•			
Stage 2 Review: Blank - Method blank?	•			ND
Stage 2 Review: Precision/Accuracy - Lab Replicate?	•			QC Batch F0921TSD5: The Laboratory Replicate for Client Sample ID BA5B02201321-23 met criteria.
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Results (i.e. correct analytes)?	•			
Stage 2 Review: Field Duplicates - RPD within limits?	•			Precision between field duplicate pairs met criteria for this method.

Stage 2 Review: Case Narrative - Anomalies?	•			All samples analyzed outside of holding time. QC Batch 150929S07, Client Sample ID BA5B02201325-27: The MS/MSD percent recoveries/RPDs for one or more analytes were outside the control limits. QC Batch 150929L07 / 150929S07: The surrogate recoveries were outside acceptance criteria for the dilution runs of the following Client Sample IDs: BA5B02201307, BA5B02201313-15, and BA5B02201317-19.
Stage 2 Review: Samples - Collection date?	•			11/19/2013
Stage 2 Review: Samples - Extraction date?	•			09/29/2015
Stage 2 Review: Samples - Analysis date?	•			10/16/2015, 10/19/2015 and 10/20/2015
Stage 2 Review: Samples - Holding time?		•		Holding time exceeded project criteria, but samples were extracted and analyzed within 2x holding time. The associated samples are qualified as estimated with a potential low bias (J-/UJ).
Stage 2 Review: Samples - Batching?	•			150929L07 / 150929S07
Stage 2 Review: Samples - Surrogate recoveries?		•		The following Client Sample IDs, analyzed at dilutions, had high surrogate recoveries for 2,4,5,6-tetrachloro-m-xylene. Associated detected results are qualified as estimated with a potential high bias (J+). BA5B02201307 (50x): 143% BA5B02201313-15 (100x): 145% BA5B02201317-19 (50x): 133%
Stage 2 Review: Samples - Lab qualifiers?	•			J-Flag: Result >= MDL, <= RL.

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - Lab Replicates?			•	
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150929S07, Client Sample ID BA5B02201325-27: For 2,4'-DDE, 4,4'-DDE, 4,4'-DDMU, and 4,4'-DDNU the sample concentrations are greater than four times the spike concentrations so precision and accuracy could not be evaluated for these analytes. Very high MS/MSD % recoveries (>UCL of 135%) for the following analytes. Associated detected results are qualified as estimated with a potential high bias (J+). See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries. 2,4'-DDD: 135% / 213% 2,4'-DDT: 167% (MSD) 4,4'-DDD: 145% / 361% 4,4'-DDT: 224% / 363% High MS/MSD % RPDs for 4,4'-DDD (35%) and 4,4'-DDT (35%). Associated results are qualified as estimated (J/UJ).
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA5B02201301: 10x BA5B02201303: 10x BA5B02201305: 10x BA5B02201307: 10x and 50x BA5B02201309-11: 10x and 50x BA5B02201313-15: 10x and 100x BA5B02201317-19: 10x and 50x BA5B02201321-23: 10x BA5B02201325-27: 10x BA5B02201349-51: 10x
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?		•		Precision between field duplicate pairs met criteria for this method except as noted in the Field Duplicate Report. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ).

Review Questions

Method: SW9060

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch F0928TOCS2: A project sample from another SDG was used for the MS/MSD analysis. Consequently, an assessment of precision cannot be made for these samples. QC Batch F0928TOCS3, Client Sample BA5B02201309-11: A low MSD % recovery for TOC of 62%. Associated detected results are qualified as estimated with a potential low bias (J-). QC Batch F0929TOCS2, Client Sample ID BA5B02201345-47: A low MSD % recovery for TOC of 70%. Associated detected results are qualified as estimated with a potential low bias (J-). A high MS/MSD RPD for TOC of 22%. Associated results are qualified as estimated (J). QC Batch F1014TOCS1, Client Sample ID BA5B02201307: MS/MSD recoveries and RPD met project criteria. See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries.
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			QC Batches F0928TOCL2, F0928TOCL3, F0929TOCL2: LCS samples only analyzed. QC Batch F1014TOCL1: LCS/LCSD analyzed in this batch.
Stage 2 Review: Precion/Accuracy - Lab Replicates?			•	
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?			•	No dilutions.
Stage 2 Review: Quantitation - Results (i.e. correct analytes)?	•			
Stage 2 Review: Field Duplicates - RPD within limits?		•		Precision between field duplicate pairs met criteria for this method except as noted in the Field Duplicate Report. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ).

This report assesses the analytical data quality associated with the analyses listed on the preceding cover page. This assessment has been made through a combination of automated data review (ADR) and supplemental manual review, the details of which are described below. The approach taken in the review of this data set is consistent with the requirements contained in the Sampling and Analysis Plan for Sediment Sampling Program 2013 Program – Part 1 QAPP for Remedial Action at Palos Verdes Shelf (OU5 of the Montrose Chemical Corporation Superfund Site), Los Angeles, California to the extent possible. Where definitive guidance is not provided, data has been evaluated in a conservative manner using professional judgment. In cases where two qualifiers are listed as an action, such as 'J/UJ', the first qualifier applies to positive results, and the second to non-detect results.

Samples were collected by Innovative Technical Solutions, Inc., Walnut Creek, CA; analyses were performed by CALSCIENCE ENVIRONMENTAL LABS, INC., GARDEN GROVE, CA and were reported under sample delivery group (SDG) 15021772.Chemlab_v1.txt. Results have been evaluated electronically using electronic data deliverables (EDDs) provided by the laboratory. The laboratory data summary forms (hard copy) have been reviewed during this effort and compared to the automated review output. Findings based on the automated data submission and manual data verification processes are detailed in the ADR narrative.

The following quality control elements were supported by the electronic deliverable and were evaluated during this review effort:

Blank
Blank - Negative
Lab Replicate RPD
LCS Recovery
MS Recovery
MS RPD
Prep Hold Time
Surrogate
Test Hold Time

The following quality control elements were either not applicable to the deliverable, or were not supported by the electronic deliverable, and were therefore not included in the automated data review. Those elements required for the project were reviewed manually, as narrated in the Comment section below.

Ambient Blank
Calibration Blank
Calibration Blank - Negative
Continuing Calibration Verification
Equipment Blank
Field Blank
Field Duplicate
Initial Calibration Verification
Material Blank
Negative Blank
Trip Blank

A representative sampling or ten percent of sample and QC results were manually evaluated for compliance with project specific requirements and consistency with hard copy results. The following summaries were generated during the evaluation of this data set and are included in this report as applicable.

Batch – The analytical batch report is reviewed for completeness and compliance with project specific requirements. Incomplete or non-compliant run sequences are identified and their impact on data quality are discussed in the narrative.

QC Outlier – Results exceeding the evaluation criteria are reviewed for compliance with project requirements and a minimum of ten percent of the non-compliant QC values reported electronically are verified for consistency with hard-copy values.

Qualified Results – Qualified results are evaluated for compliance with project requirements and ten percent of qualified results are verified for consistency with the QC Outliers.

Rejected Results – All rejected results are evaluated for compliance with project requirements. The reason for rejection of the data is verified against hard copy data.

Field Duplicates – Field duplicate comparison results are evaluated for compliance with project requirements and ten percent of values reported are verified for consistency with the hard-copy data.

Data Submission Warnings – Warnings encountered during the data submission process are evaluated and their affect on data quality is discussed in the narrative below.

Analytical deficiencies, project non-compliance issues and inconsistencies with hard copy results observed during ADR evaluation process and their impact on data quality are summarized in the narrative below.

A total of 990 results (100.00%) out of the 990 results (sample and field QC samples) reported are qualified based on review and 0 results (0.00%) have been rejected. Trace values are not counted as qualified results in the above count. The qualified results are detailed in the following tables and discussed in the narrative below, where appropriate.

Narrative Comments

Project samples listed on COC include five individual samples and 13 composite samples of two samples each. The laboratory lists all of the individual samples with unique Lab Sample IDs as well as the composite samples. The time sampled for the composite samples are listed on the COC but not listed on the Case Narrative. Samples received in good condition per case narrative.

The holding time for all test methods exceeded project criteria of one year if stored frozen at -18°C after collection. The sediment samples were collected on 11/19/2013 and preserved in deep freeze until extraction and analysis. All samples qualified as estimated with a potential low bias (J-/UJ) for holding time exceedances.

The project samples in SDG 15-02-1772 are the primary samples for Location ID BA4C. Project samples from SDG 15-02-1764 were submitted as the field duplicate pairs for this analysis. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ). See the Field Duplicate Report for specific qualifications.

Reason Code Definitions

Code	Definition
D2	MS RPD exceeded established criteria.
D5	Field duplicate precision
H1	Test Hold Time
H2	Prep Hold Time
M	Matrix spike recovery was outside established criteria.
S1	Sample less than 50% solids
TR	Trace Level Detect

Flag Code and Definitions

Flag	Definition
J	Estimated: The analyte was positively identified, the quantitation is an estimation due to discrepancies in meeting certain analyte-specific quality control criteria.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a "tentative identification".
NJ	The analysis indicates the presence of an analyte that has been “tentatively identified” and the associated numerical value represents its approximate concentration.
R	The data are rejected due to deficiencies in meeting QC criteria and may not be used for decision making.
U	Undetected: The analyte was analyzed for, but not detected.
UJ	The analyte was not detected; however, the result is estimated due to discrepancies in meeting certain analyte-specific quality control criteria.

Review Questions

Method: BNASIM

Review Questions	Yes	No	NA	Comment
Stage 2 Review: Precision/Accuracy - MS/MSD?		•		QC Batch 150929S05, Client Sample ID BA4C01201329-31: For 2,4'-DDE, 4,4'-DDD, 4,4'-DDE, 4,4'-DDMU, and 4,4'-DDNU the sample concentrations are greater than four times the spike concentrations so precision and accuracy could not be evaluated for these analytes. Very high MS/MSD % recoveries for the analytes listed below. Associated results are qualified as estimated with a potential high bias (J+). 2,4'-DDD: 191% / 263% 2,4'-DDT: 299% / 323% MS/MSD % recoveries outside project criteria for 4,4'-DDT (35% / 405%). Associated results are qualified as estimated (J/UJ). A high RPD for 4,4'-DDT (75%). Associated results are qualified as estimated (J/UJ). See QC Outlier Report for %R corrected for wet weight reporting of spike recoveries.
Stage 2 Review: Precision/Accuracy - LCS/LCSD?	•			
Stage 2 Review: Quantitation - PQLs?	•			
Stage 2 Review: Quantitation - Dilution Factor?	•			The following Client Sample IDs were analyzed at dilutions in order to appropriately quantitate the target compounds with the highest concentrations: BA4C01201303: 10x BA4C01201305: 10x BA4C01201307: 10x BA4C01201309-11: 10x BA4C01201313-15: 10x BA4C01201317-19: 10x BA4C01201321-23: 10x BA4C01201325-27: 10x BA4C01201329-31: 20x BA4C01201333-35: 10x and 50x BA4C01201337-39: 10x and 50x BA4C01201341-43: 10x BA4C01201345-47: 10x BA4C01201349-51: 10x BA4C01201353-55: 10x BA4C01201357-59: 10x
Stage 2 Review: Quantitation - Results (i.e. correct analytes, RTs)?	•			
Stage 2 Review: Quantitation - Column/Detector RPD?			•	
Stage 2 Review: Field Duplicates - RPD within limits?		•		Precision between field duplicate pairs met criteria for this method except as noted in the Field Duplicate Report. Discrepancies outside of project criteria between the reported results in these duplicate pairs are qualified as estimated (J/UJ).
