

Notes

1. Data were not normalized for organic carbon.
2. Vertical scale is in centimeters (cm). Vertical scale is exaggerated by a factor of approximately 5,000.
3. Bed interval of 0-8 cm is shown separated from the remainder of the vertical profile.
4. View is from the Pacific Ocean towards the shoreline.
5. The profile is a flattened rendition of the 60-meter (m) isobath. The concentration isopleths may appear disjointed and irregular at bends in the actual 60-m isobath. (Bends appear as folds).
6. Edges of the modeled area are shown on Figure 2-1.

Legend

----- Approximate location of outfall diffuser

① Sanitation Districts' transect

Abbreviations

OD Outfall diffuser

Total PCBs (ug/kg)

■ < 70	■ 300 - 600
■ 70 - 150	■ 601 - 1,000
■ 150 - 300	■ > 1,000
